PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience designing and developing web applications, backend services, and database-driven systems. Built an **E-commerce Product Management System**, **Todo Application**, and **Login Authentication System**, covering application development from user-facing functionality to backend processing and database integration. Strong understanding of object-oriented programming, layered application architecture, RESTful services, authentication, database operations, and application debugging. Experienced in developing and testing applications using Java, Spring Boot, React, SQL, JDBC, Git, Maven, and related development tools.

TECHNICAL SKILLS

Languages: Java, SQL, Python

Backend: Core Java, OOP, Collections, Exception Handling, JDBC, Servlets, JSP, Spring, Spring Boot, REST APIs, Spring Data JPA, Hibernate, MVC

Frontend: HTML5, CSS3, JavaScript, React, React Router

Database: MySQL, H2, SQL, Database Integration

Tools & Build: Maven, Apache Tomcat, Eclipse, IntelliJ IDEA, VS Code, MySQL Workbench, Postman

Version Control: Git, GitHub, Docker, Kubernetes, Linux, SDLC

PROJECTS

1.E-commerce Product Management System | Java, Spring Boot, REST API, Spring Data JPA, React, SQL, Maven

- Developed a full-stack e-commerce product management application with a Spring Boot REST API backend and React-based frontend.
- Implemented product management workflows including product creation, retrieval, update, deletion, search, pagination, and sorting through REST endpoints.
- Built separate admin functionality for controlled product management and integrated frontend requests with backend APIs.
- Used Spring Data JPA for persistence and designed a layered backend architecture using Controller, Service, and Repository components.
- Tested REST endpoints using Postman and managed source code using Git and GitHub.

Todo Application | Java, Spring Boot, REST API, Spring Data JPA, H2, Maven

- Developed a Todo management application using Spring Boot and REST APIs for creating, retrieving, updating, and deleting task data.
- Implemented persistence using Spring Data JPA with an H2 in-memory database and configured the application using YAML-based configuration.
- Structured the backend using Controller, Service, and Repository layers to separate API handling, business logic, and data access.
- Tested API requests and responses with Postman and validated database operations through the H2 console.

Login Authentication System | Java, Servlets, JSP, JDBC, MySQL, Maven, Apache Tomcat, MVC

- Developed an end-to-end Java web application for user registration, login authentication, profile management, account updates, and logout.
- Implemented HttpSession-based authentication and session management to maintain authenticated user state across requests.
- Applied MVC and layered architecture using Controller, Service, DAO, and Model components for maintainable application design.
- Integrated MySQL using JDBC and PreparedStatement for secure database interaction and deployed the application on Apache Tomcat.

Intelligent Cloud-Based Analytical System for Detecting Silent Failures in DevOps Pipelines | Python, Pandas, Matplotlib, AWS CloudWatch

- Developed an analytical system to identify gradual or silent failures in DevOps pipeline and cloud infrastructure behavior using time-series performance metrics.
- Processed and analyzed cloud monitoring data using Python and Pandas and visualized metric trends using Matplotlib.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — The Mind IT, Trichy | Jul 2025 – Aug 2025

- Developed and maintained web application modules and database components supporting backend application workflows.
- Worked on Java-based backend logic, database integration, testing, debugging, and application deployment activities.

Web Development Intern — SagaSoft Technologies Pvt. Ltd., Villupuram | Feb 2025

- Assisted in developing web application modules and backend components with database integration and application data handling.
- Participated in debugging and performance improvement activities during application development.

EDUCATION

B.E. Computer Science and Engineering | Surya Group of Institutions, Vikiravandi | 2022 – 2026 | CGPA: 8.4

HSC -Sri Vidya Mandir Senior Secondary School(CBSE) – 83% | 2022

SSLC - Sri Vidya Mandir Senior Secondary School(CBSE) – 85% | 2020

CERTIFICATIONS

Full Stack Java Development — QSpiders

NPTEL — Data Analytics with Python

ADDITIONAL STRENGTHS

Problem Solving | Debugging | API Testing | Database Integration | Application Development | Team Collaboration | SDLC | Troubleshooting
